

Index

- action
 - Principle of least, 72
- angular frequency, ω , 19
- Bohr radius, 41
- boundary conditions, 18
- classically allowed, 50
- classically forbidden, 49
 - region, 53, 80
- complex conjugate, 65
- Compton wavelength, 42
- conjugate variables, 3
- Corpus Christi College, Cambridge,
5
- Coulomb, 40
- current, 77
- curvature, 12, 38
- de Broglie
 - hypothesis, 71
- differential equation
 - ordinary, 19
 - second order, 19
- differentiation
 - chain rule, 14
 - function of function, 14
 - partial, 86
 - product rule, 14
- diffraction, 4
- dimensionless form, 52
- dynamics
 - of quantum states, 98
- eigen energy, 34, 51
- eigen equation, 38
- eigenfunction, 33
- eigenstate, 38
- eigenvalue, 38
 - real, 39
- Einstein, 42
- electron volt, 42
- electron-positron pair, 42
- energy
 - binding, 41
 - Coulomb, 87
 - eV, 42
 - zero-point, 57
- energy levels, 51
- expectation value, 73
 - for quantum SHO, 74
- exponential

- complex, 65
 - definition of, 13
- Feynman, 43, 72
- fusion reactions, 45
- Gaussian, 12
 - 2D, 86
 - standard form, 17
 - standard form of, 57
 - variance, 17
- Hamiltonian, 32
- harmonic motion
 - quantum, 56
 - SHM, 18
- Heisenberg
 - uncertainty principle, 2
- integral
 - definite, 14
 - indefinite, 15
- integration
 - by parts, 16
 - constant of, 15, 18
 - multiple, 87
- interference, 4
- kinetic energy
 - negative, 11, 50, 77
 - of confinement, 3
 - positive, 50, 77
 - quantum, 12
- minimal uncertainty, 12
- modulus, 65
- momentum
 - vector, 85
- motion
 - zero-point, 57
- muon, 43
- muonium, 44
- nanowires, 90
- nodes
 - counting, 39
 - number of, 39
- normalisation
 - of probability, 38
- nuclear stability, 43
- number
 - complex, 64
 - complex, magnitude, 65
 - imaginary, 63
- operator, 31
 - gradient, 87
 - kinetic energy, 32, 89
 - momentum, 71
- orthogonal, 28, 58
- orthogonality, 34
- pair production, 42
- path integral, 72
- phase
 - of complex number, 66
 - shift, 79
- Planck's constant, 2
- plane
 - complex, 64
- polynomials
 - Hermite, 58
 - Legendre, 34
- potential
 - 2-D harmonic, 103
 - 2-D infinite square, 89
 - attractive, 50
 - Coulomb, 33
 - double well, 61
 - finite square well, 50
 - harmonic, 54

- infinite square well, 36
 - semi-infinite, 60
 - step, 77
- principal quantum number, 59
- probability, 10
- probability density, 2

- quanta, 38, 59
- quantisation, 37
 - transverse, 92

- reflection
 - total external, 92, 96
- refraction, 94
- relativity, 42

- Schrödinger equation, 32
 - time-dependent, 98
 - time-independent, 33
- solution
 - separable, 90
- state
 - bound, 52
 - eigen, 73
 - superposed, 75
- Sturm–Liouville
 - completeness, 58
 - equations, 33
 - orthogonality, 58
 - theory, 39, 53, 58

- Taylor expansion, 26
- Thomson, G.P., 5
- Thomson, J.J., 4
- Trinity College, Cambridge, 5
- tunnelling, 9, 45, 83
- two slit experiment, 69

- uncertainty
 - minimal, 12, 57, 75

- vacuum
 - polarisation of, 43
- variables
 - conjugate pairs, 3, 85
- vector, 26
 - orthogonal, 28
 - scalar product, 28

- wave
 - complex oscillatory, 77
 - interference, 22
 - matter, 71
 - standing, 36
- wave–particle duality, 4
- wavefunction, 2
 - collapse of, 3, 70, 89
 - matching, 79
 - matching of, 51
 - simple harmonic oscillator, 12
- wavelength
 - Compton, 42
- wavevector, 37, 50
